CDEH Description From The 1964 DOD OCD Annual Statistical Report

Federal responsibility for various medical and health functions in both natural and man-made disasters is assigned to Department of Health, Education, and Welfare, U. S. Public Health Service, (USPHS).

The Division of Health Mobilization, Office of the Surgeon General, provides the program direction and service coordination for such activities. Included is the management of the Civil Defense Medical Stockpile which is designed to augment postattack domestic inventories of medical supplies and equipment essential to survivor medical care and to replace hospital beds which may have been destroyed or rendered unavailable due to radioactive fallout.

The nucleus of the medical stockpile is the Civil Defense Emergency Hospital (CDEH). It is an austere but completely functional 200-bed general hospital designed to be set up within an existing structure such as a school, church, or community center which has been preselected by competent local authorities.

The CDEH has the primary mission of assuring the continuity of essential medical care services at community level during the early postattack phase. The material contained in the CDEH provides a functionally balanced stock directly related to the potential medical care workload which may be experienced within a community during the postattack period. Accordingly, the unit constitutes a valuable resource asset which may be the only reliable source of material for expanding existing hospitals or as replacement for destroyed facilities.

To set up the CDEH requires a floor area of 15,000 square feet which will permit separation of wards, operating rooms and other functional sections; and a suggested staffing complement of 10 physicians, 4 administrators and assistants, 34 professional nurses, 18 practical nurses, 6 anesthetists, 2 pharmacists, 128 medical aides and 124 other personnel, including dentists, laboratory technicians, X-Ray technicians, maintenance engineers, clerks, helpers, messengers, and housekeepers to be drawn from local resources.

The CDEH contains provisions for the following departments: laboratory; pharmacy; X-Ray; operating rooms, including multiple operating suites; wards, admitting and sorting, and central supply. Auxiliary equipment included is a limited supply of medical and administrative records, a 15 KW generator to provide auxiliary power if local electrical supply is disrupted, and a 1,500 gal lon water tank and pumping unit for emergency water supply.

CDEH's are assigned by Federal-State agreements, based on carefully developed criteria which include such factors as strategic locations, adequacy of storage facility and responsible custodianships.

The CDEH is organized to function independently, or in conjunction with existing hospitals.

INTRODUCTION

SERIES 10000 MOD "A"

PACKAGED DISASTER HOSPITAL

The components listed in this publication comprise a completely functional 200-bed Packaged Disaster Hospital (PDH) with a 30-day emergency operational capability. The Series 10000, Modification A, PDH (usually referred to as a Mod "A" PDH), as described herein, represents one type of updated and refurbished PDH.

The purpose of this publication is to provide a component listing of the Mod "A" by hospital section and packing case number. The items are presented in case number sequence, with components of mixed cases listed in alphabetical order. Other pertinent data and information on this PDH and its components are presented in the main list or in special tables.

The following information is provided on each component of the Mod "A" PDH:

- 1. Case number
- 2. Federal stock number
- 3. Storage code
- 4. Nomenclature
- 5. Unit of issue
- 6. Unit price
- 7. Total quantity per PDH

Weights and cubes of packing cases are included, as well as storage and transportation data summaries.

All information presented in this publication is subject to change without notice, as substitution of functionally equivalent items may be made in the assembly of Mod "A" PDH's to utilize existing depot stocks of materials or to reflect changes in medical practice. Such modifications may necessitate variations in the component schedules and packing arrangements in individual units.

LOGISTICS AND COMPOSITION

PACKAGED DISASTER HOSPITAL

THE HOSPITAL CONSISTS OF 585 LINE ITEMS PACKED IN 484 CASES.

STORAGE REQUIREMENTS

The following storage requirements are based on 6 foot stacking height plus dunnage and access aisles for inspecting stock:

| | No. of Cases | Total Cubic Feet |
|--|-----------------|---------------------|
| Heated Storage (Items subject to damage by freezing) | 7 | 30 |
| Cold Storage (35 $^{\circ}$ to 46 $^{\circ}$ F) | 5 | 24 |
| Flammable Storage (Items which might constitute a fire hazard to other stocks) | 15 | 50 |
| General Storage (All other items) | 457 | 5400 |

ITEMS FOR ROTATION

Some PDH agreements provide for the rotation of certain shelflife items with an affiliated hospital. This may cause some variance with the overall logistics and storage requirements stated herein.

| TRANSPORTATION DATA | |
|---------------------|-----------------|
| Total Weight | 35,535 lbs. |
| Total Cube | 2,433.8 cu. ft. |

PACKING LISTS

There are 51 cases containing an assortment of items in order to reduce the total number of boxes. Of these mixed cases, those with 4 or more different items are identified with a packing list in an envelope -- one copy attached to the outside of the box -the other copy placed inside the box.

COMPONENT LISTING AND STORAGE DATA

This document serves as a master packing list for the entire hospital and a copy is attached to Case No. 633 (Water Tank), Case No. 690 (Mixed Case -- Tools) and inside Case No. 605 (Mixed Case -- Laboratory Supplies).

CASE NUMBERS

To readily identify the contents of each case, the following case numbers have been assigned:

| Section | Mixed Cases | Single Item Cases |
|----------------|-------------------|--|
| I | 1/2, 6, 69 | 7/23, 26/61, 63/66, 68, 72/74, 708/712 |
| п | 78/82 | 83/252, 700/707, 713/718 |
| III | 254, 257/271, 273 | 274/296 |
| IV | 299, 301/306 | 307/308, 317/339, 341/343, 347/349, 353/423 |
| v | | 427/428 |
| VI | 599/600 | 601/602 |
| \mathbf{VII} | 604/606, 608 | 609/612 |
| VIII | | 615/620 |
| IX | 623/624 | 625/627 |
| Х | 629,636 | 630/635 |
| XI | 637/638 | 639/645 |
| XII | 648 | |
| XIII | 650/652 | 653/679, 688/689 |
| XIV | 690 | |

Several numbers have not been used, but may be used in the future to permit replacements or additions to the hospital.

PRICE

The price per unit of issue, as stated in this publication, is a fixed average unit price computed on the basis of total quantity of an item procured for the medical stockpile. It does not reflect the current replacement cost of an item.

KEY TO STORAGE CODE COLUMN

Symbols shown below express the following:

- A No specialized storage requirements with respect to temperature; however, a dry, covered storage area is required.
- B Normal warehouse temperatures required not below 50°F nor above 86°F (for all localities).
- C Refrigeration temperatures required $(35^{\circ} \text{ to } 46^{\circ} \text{F}).$
- I Flammable. Should be kept in separate area where it will not create fire hazard for other stocks.
- K Drug abuse control item.
- N Do not freeze; subject to damage by freezing (temperatures below 32° F).
- Po Items with potency period governed by expiration date.

PROPRIETARY NAMES (Trade Names)

OF OFFICIAL DRUGS AND CHEMICALS

1. A selected list of proprietary names (trade names) are cross-referenced to their appropriate Federal item names as used in this publication.

2. Trade-name information related in any manner to the product of a manufacturer contained in this catalog is included only as an aid in the conduct of official business and does not indicate an endorsement of the product listed in preference to comparable products which may not be listed. The inclusion of a trade name in this list does not indicate that the manufacturer's specific item will be furnished or is in the supply system.
