Water Filtration Process

Transforming Air Into Pure Water, How?

The EcoloBlue 28 system is a new, state of the art water generating machine which takes moisture out of thin air and turns it into pure drinking water.

How Many Liters Does It Produce Per Day?

It can produce up to 28 liters of water in a 24-hour period, and could store up to 16 liters.

What Kind of Multi-Stage Filtration System?

The multi-stage filtration system ensures the purest drinking free of chemicals using the "Reverse Osmosis" and the "Ultra Violet" filters, while the "Electrostatic Anti-bacteria & Anti-fungus" filter is cleaning the air in your home/office.

Specifications

Model No.:	28
Voltage:	AC 115 V/220 V
Frequency:	50 Hz/60 Hz
Operation Wattage:	495 W
Heating Wattage:	500 W
Refrigerant Type:	R22/R407c
Production Capacity: (30°C, 80% humidity)	28L/day
Storage Capacity:	12 L
Temperature Range:	15°C~35°C
Humidity Range:	35%~95%
Size (cm):	39 x 39.5 x 100
Net Weight:	41.5 kg
